

## Parental Consent Form

We are preparing to start the MAD About Mattering pilot project (<https://madaboutmattering.wikispaces.com/>) with the \_\_\_\_ class. This will be a very exciting project and will take place during the Spring of 2016 with several classrooms participating.

Students will be learning about the fundamentals of mobile app design and development. The goal of this project is to inspire creativity and entrepreneurship by creating a movement that encourages the creation of apps that produce social change. Students will work together to create a duplicable model of quad-engineering where four classrooms work together to solve important global problems and release that model as an open education resource (OER) for teachers around the world to use and adapt.

This will be conducted during class time with \_\_\_\_\_ and they will allow them to work in the room at additional times as they request it. They may also access the wiki from home if needed.

## Permission Form

Students will be taught digital safety skills but be aware that your student will have to be accountable for their actions and that they will have to communicate to the teacher if any problems arise. We want to use digital tools for education purposes, however, there are always people online that are not there for educational purposes. We therefore need your permission to give your student access to participate in this project. You may wish to ask your student to provide you with their username and password for the environment. Please contact \_\_\_\_ at \_\_\_\_\_ should you have any questions.

## Form

\_\_\_\_\_ Yes, I will allow my student to participate in MAD About Mattering. I understand that they will be under supervision while at school but that I am to supervise them at home.

\_\_\_\_\_ No, I do not wish my student to participate in the project.
